

Custom Order GridModule

This extension allows you to fully customize and sort the order of columns displayed in the admin order grid. It also gives full sorting and filtering capability for all of these columns. Once columns have been selected you can drag and drop to order them. You can also define column widths, set the default sort column and direction, and enable/disable extension functionality.

STEPS FOR INSTALLATION

1. Installation

- Magento Custom Order Grid Module installation is super easy you need to copy-paste folders in Magento root directory.

2. Create/Manage Sales Order grid settings

- Go to admin panel System -> Configuration -> Sales Order Grid Setting(left menu).

Current Configuration Scope:
Default Config ⌵
